

UPCYCLOPEDIA

The Transition Town Totnes Arts Network have been inspired by the SPARC Recyclopaedia (available to download from the TTTAN website) that we recently republished, gifting this for free on the Transition Town Totnes website. TTT Arts Network have started a new project called the Upcyclopedia, and we are seeking submissions of content from anyone who wishes to contribute.

"Upcycling is the process of converting waste materials or use-less products into new materials or products of better quality or for better environmental value"

The Upcyclopedia will be a resource of illustrated instructions for how to create fabulous upcycled art, in a way that makes environmentally friendly re-use accessible to all.

Transition Town Totnes Arts Network is also looking for people who would be interested in contributing to the up and comin - "Upcyclopedia" - check out the site for more information, or come along to the Monday Morning Moots to have a chat about it.
